

MOBILECHARGE™ FOR BLACKBERRY® SMARTPHONES

Take your BlackBerry to a new level with the MobileCharge™ series of Wireless POS solutions for BlackBerry® Smartphones. MobileCharge™ solutions can be used to process credit card and PIN-less debit card payments from almost anywhere.

Multiple Payment Options

While MobileCharge allows mobile professionals to authorize manually-entered payments in real time, MobileChargePro™ adds the power of an integrated card swipe/thermal printer cradle. This enables merchants to process card present transactions and take advantage of favorable discount rates from their bank. In addition, receipts can be issued for cash payments.

Intelligent Processing

Additional components allow merchants to:

- connect to barcode databases for itemized sales
- manage real-time inventory
- use digital forms for data capture
- obtain digital signatures
- GPS stamp the transaction
- integrate to a variety of back-end systems

With MobileCharge, you can:

- Increase sales
- Reduce bad debt
- Increase customer satisfaction
- Reduce bank fees

Transaction Management

MobileCharge solutions enable a full range of transaction management options, including:

- refunds
- voids
- reauthorizations
- recurring payments

In addition, fraud prevention tools are available to minimize merchant risk.

Transactions are processed by Skipjack Financial Services; North America's leading payment service provider.

MobileCharge can be used by:

- Field tech and delivery personnel
- Airline industry
- Trade show attendees
- Hospitality
- Limousine/taxi
- Restaurants
- Many others

Key Advantages

- Increases sales
- Reduces incidences of bad debt
- Improves cash flow
- Improves profit margin
- Reduces customer churn
- Increases operational efficiency
- Improves transaction management
